- **Interface development:**
Figma, AdobeXD
- **Documents:**
Microsoft Office (Word, Excel, Access)

ADDITIONAL INFORMATION

The presence of a driver's license:

Category C (September 2024)

Responsibilities:

I am a web developer engaged in creating and maintaining web applications. My main skills and achievements include:

- **Development and design of web applications:**

I am engaged in the full cycle of web application development - from the initial analysis of requirements to the creation of the system architecture and the implementation of functionality. I can effectively develop both client and server parts, creating solutions that meet business requirements and user expectations.

- **Performance optimization and scalability:**

In my work, I focus on optimizing application performance and scalability. I optimize databases, code, and interaction between system components to ensure fast response and high availability of applications.

- **System integration and process automation:**

My experience in integrating various systems and services allows me to create comprehensive solutions that effectively interact with each other. I set up CI/CD processes to automate the assembly, testing and deployment of applications, which significantly speeds up the development process and minimizes the risk of errors.

- **Analysis and troubleshooting:**

I have the skills to diagnose and eliminate technical problems that arise during the development and operation of applications. I can quickly find and fix bugs, as well as implement improvements to improve the reliability and functionality of applications.

- **Teamwork and project management:**

Effectively interact with team members, customers and other stakeholders to successfully complete projects. I manage tasks, set priorities and coordinate work to ensure timely completion and high-quality results.

- **Designing user interfaces:**

I create intuitive and attractive user interfaces that enhance the user experience. I rely on modern design approaches and responsive layout to ensure compatibility with various devices and screens.

- **Continuous learning and adaptation:**

I constantly monitor the latest trends and technologies in the field of web development, which allows me to effectively apply new tools and methods. I strive for continuous professional

development and am ready to introduce innovative approaches into my work.

- **Infrastructure Management and Deployment:**

I set up and administer the infrastructure for application deployment, including web server configuration and containerization. This helps to ensure reliable and efficient deployment of applications in various environments.

A little bit about me:

I am easy to communicate, I try to be friendly and accommodating. I am the kind of person who appreciates sincerity and openness in communication, I am not afraid to ask for help or offer my own if I see that it is required. It is important to me that people feel comfortable in my presence and can trust me. After all, I am always ready to support and develop ideas.
